FIREBREAK — 5-Minute Fit Check

Listen 80%, talk 20%. Goal: qualify the fit and book the demo — or bow out honestly.

---

1 · FRAME (30 sec)

"Appreciate the 5 minutes. My goal is just to see together if FIREBREAK's worth a closer look — a few quick questions, 60 seconds on what it does, and if it's not a fit I'll say so. Fair?"

2 · SITUATION (pick 2)

- "What are you protecting — and what's your first line when a fire starts?"
- "What do you use today — water, foam, dozers, crews — and where does it fall short?"
- "What keeps you up at night on fire risk?"

3 · PROBLEM (pick 1–2, by category)

- **Private industry:** first 5–10 min before mutual aid? where is water/foam a liability? AFFF transition?
- **Airports:** where in the AFFF phase-out? grass/brush along the field?
- **Wildfire:** holding line with no water? embers ahead of the front?
- **Rx burns:** acres missed to the window? containment close calls?
- **HOA / WUI:** insurance / defensible-space pressure? who clears the greenbelts?

4 · STAKES (pick 1)

- "If that went wrong — [spread / escape / non-renewal / loss] — what does it cost you?"
- "What's the cost of living with it another season?"

5 · DECISION (pick 1–2)

- "Who else is in the conversation if it's a fit?"
- "Any budget / timing window — fiscal year, fire season, renewal/audit?"

6 · WHAT IT IS (60 sec)

"FIREBREAK fights fire with air — no water, no chemicals. [Category benefit.] Patented, Made in the USA. Field test: ~6x faster than the control burn at 55% output."

7 · CLOSE

- **FIT** → "Sounds like a fit. It clicks when you see it move fire — let's grab 15–20 min for a walkthrough on [site]. [day] or [day]?"
- **NOT YET** → "Don't want to waste your time — [honest read]. If [trigger] changes, I'll reach back out."

QUALIFY — GREEN (go for the demo): owns it · feels the pain · has budget/access · has a timing trigger (season, renewal, audit). **RED (slow down):** no authority · no pain · no timeline · "just send info."
